-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 October 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Applicants' Response to Office Action, received 22 October 2008, is acknowledged.

Claim 2 has been amended.

2. Claims 1 and 2 are pending and under consideration.

Examiner's note

3. The claims of record have been reviewed and new rejections, based upon the review, are put forth below.

Priority

4. Acknowledgment is made of applicant's claim for foreign priority based on 2002-237610 filed in Japan on 16 August 2002. It is noted, however, that applicant has not filed a certified English translation of the application as delineated in 35 U.S.C. 119(b). Until a certified English translation of the application is submitted, the priority date is that of the PCT, 13 August 2003.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are drawn to a recombinant BCG vaccine being transformed with an expression vector that has a polynucleotide encoding an antigenic human immunodeficiency virus protein, wherein the polynucleotide is artificially modified so that the third position of each codon is substituted with G or C without changing the amino acid encoded by the codon.

The specification does teach: 1) a method of transforming a BCG microorganism by introduction of a modified polynucleotide which encodes an HIV protein wherein the polynucleotide is artificially modified so that the third position of each codon is substituted with G or C without changing the amino acid encoded by the codon, and, 2) detecting immune reactions to said HIV protein in guinea pigs and mice. However, the specification does not reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of a vaccine against HIV infection

7. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a method for producing a recombinant BCG vaccine by transforming a BCG vaccine with a modified polynucleotide which encodes an HIV protein. Because BCG is an already known vaccine for use against infections with *M. tuberculosis*, it is unclear what vaccine is being produced, i.e., an *M. tuberculosis* vaccine or a vaccine against the HIV protein.

Conclusion

8. No claims are allowed.
